

STREAMLINE YOUR OUTBOUND OPERATIONS

Optimize Routes & Assets

Reduce miles, fuel, and operating expenses with a trusted routing algorithm that considers all fleet constraints and customer requirements

Make Data Driven Decisions

Analyze average service times, route costs, driver and on-time delivery performance for process improvement and saving

Deliver Exceptional Customer Service

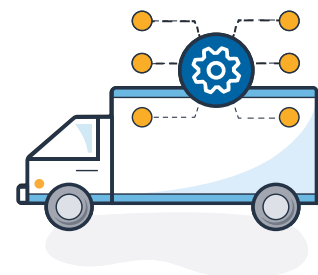

Ensure on-time deliveries with routes and schedules to accommodate critical time windows, enhancing quality and customer satisfaction

Gain Insight with Real-Time Visibility

Track vehicle locations, get dynamic ETAs and view planned vs. actual performance for proactive exception management

- Strategic planning for fixed route modeling and design and seasonal route planning tailored for the Food & Beverage industry, ensuring efficient, reliable, and adaptable delivery schedules year-round
- Integrates with Trimble Mobility, Samsara, Geotab and Verizon
- Leverage our modern driver workflow solution, Trimble Smart Workflow, for dispatch, commercial navigation, and electronic proof of delivery to ensure accurate, real-time delivery confirmation delivery operations

Start optimizing your fleet performance today: Let our Solution Engineers help you uncover areas of opportunity for improved operations, controlling spend, and providing superior customer service. | transportation.trimble.com
