

# ALL-IN-ONE FLEET ROUTING & SCHEDULING

solution designed for distributors, private fleets and manufacturers.

Provide superior customer service and control your transportation spending with an end-to-end routing, dispatch, visibility and analytics tool built to focus on strategic planning, optimized routing and real-time analytics.

Each segment of Appian’s operational workflow supports your business and gives actionable insight from departure to delivery.

- **Routing** – Multi-asset, multi-route optimization for your distribution route building.
- **Dispatch** – Dispatch-planned routes with live track and trace and planned versus actual monitoring.
- **Mobile** – Real time integrated mobile work flow.
- **Business Intelligence** – Report on configurable KPIs, and obtain insight for continual route refinement and efficiencies.
