›**Trimble**. Maps
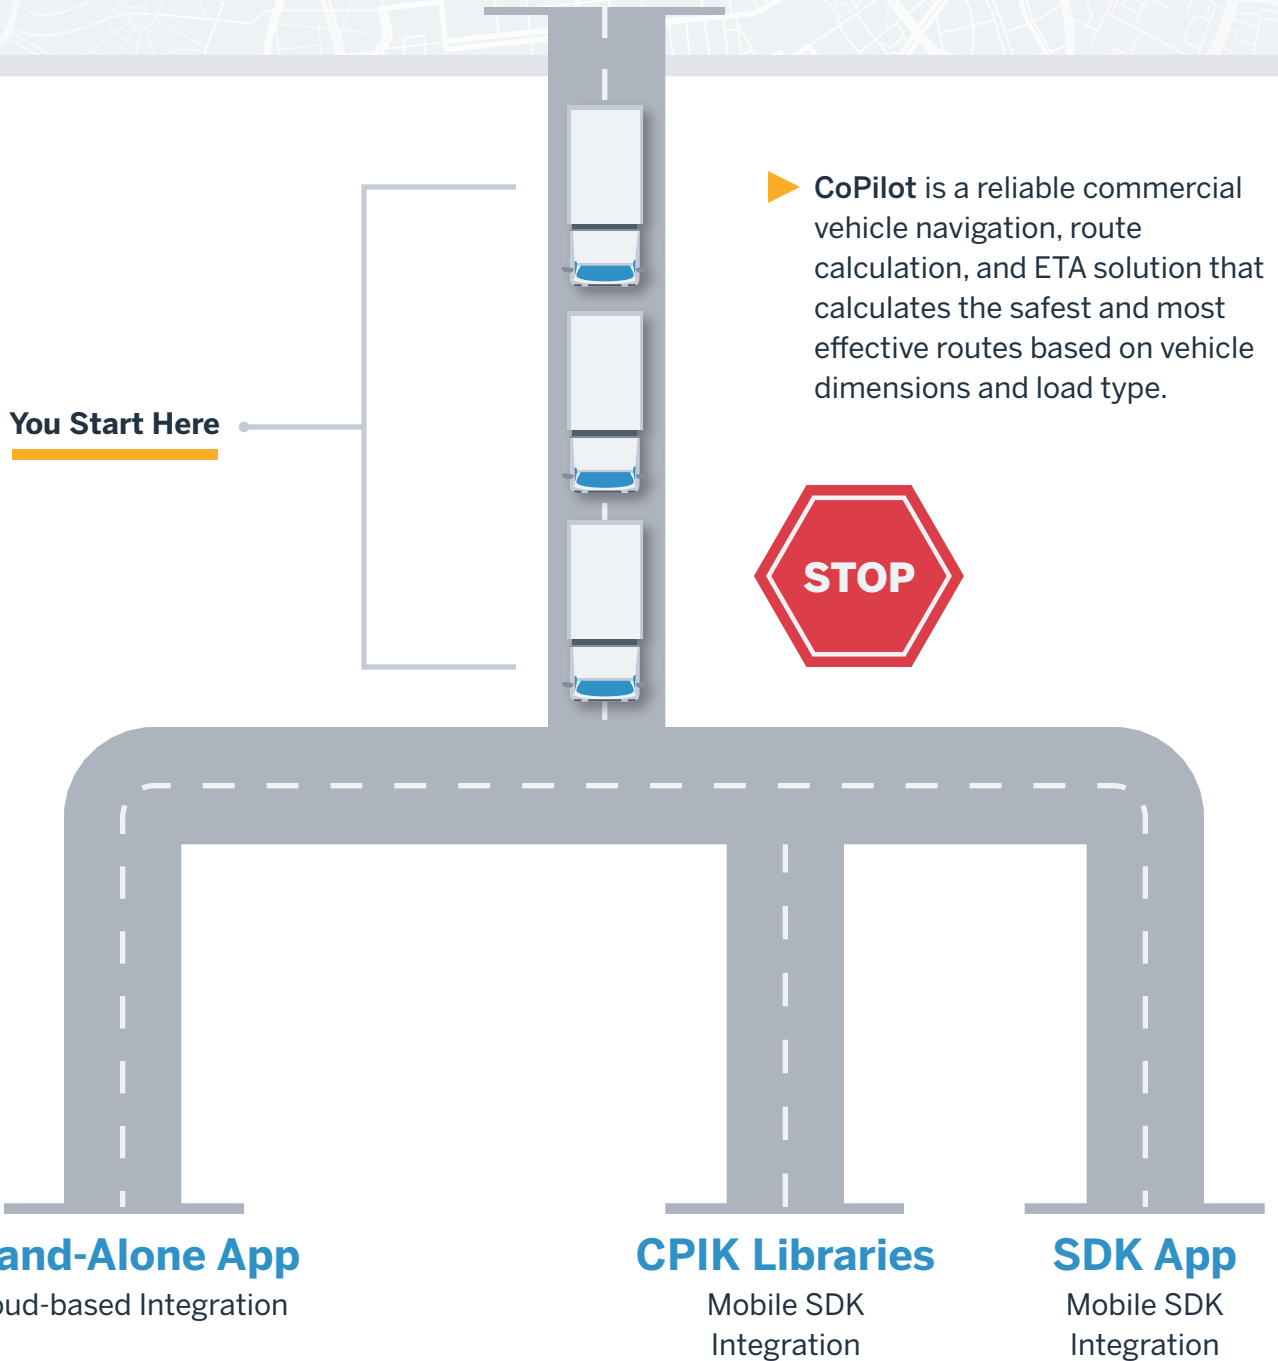

There are important **factors** to consider before you make a **decision.**

Based on these requirements, our recommendations are below:

- ✓ Company priorities
- ✓ Speed to release
- ✓ Your development resources available
- ✓ Level of customization
- ✓ Deployment

	Stand-Alone App	**CPIK Libraries**	**SDK App**
User Experience	Single App	Embedded Integration	Two Integrated Apps
Development Work Required	Yes, minimal	Yes	Yes
Control & Customization	Moderate	Advanced	Advanced
Supported Operating Systems	Android, iOS	Android, iOS, with native plus React & Xamarin support	Android only, plus limited Win32 support
Deployment	Apple/Google Play Store & Private MDM or Side Loaded	Apple/Google Play Store & Private MDM or Side Loaded	Not Supported on Public App Stores - Can be Deployed on Private MDM or Side Loaded

Our expert team will be there to support you every step of the way
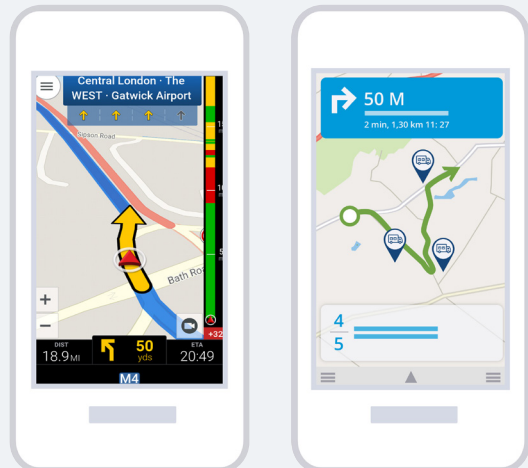

Still Not Sure?

Speed of Release

If you're looking for a solution that gets commercial navigation capabilities to drivers sooner and with minimal development work, you should consider the cloud-based stand-alone app (with optional URL launch functionality).

More Customization

If you need a highly customized version of the CoPilot interface and have the time and developer assets to implement and maintain an SDK version, our Mobile SDK options are the best choice.
